AQUASOFT SERIES "2000" SOFT STARTERS

Aquasoft starters are fully electronic voltage controller units, which offer a smooth controlled run-up without any high transient currents. These transients occur when change-over contactors, such as star to delta, are switched.

- Used as alternative to Auto-transformer and Star Delta starters.
- Supplied in a metal enclosure.
- Units are fully wired with:

By-pass contactors	Internal Isolator
Pump Protection Relay PPR/3	Ammeter
Push Buttons	Surge Arrestors
Motor and Control terminals

POWERSOFT SERIES SOFT STARTERS

Designed for 3 wire connection systems, Powersoft offers full torque at start-up by using full voltage with reduced current on the initial start-up. The starting current is restricted to 3 to 4 times full load current.

The Powersoft has the extra feature of built-in Power Factor Correction (P.F.C.).

These starters are ideal for areas where grid power is weak as they boost the voltage at the starter's supply point and with the inherent P.F.C. the motor may draw 20% to 25% less than Full Load Current.

- Supplied in a metal enclosure.
- Units are fully wired with:

Start & Run contactors	Internal Isolator
Pump Protection Relay PPR/3	Ammeter
Reactive unit for start	Power Factor Correction
Start - Stop Push Buttons	Surge Arrestors
Motor and Control terminals

SPECIAL DOL 3PH BOREHOLE PUMP-MOTOR STARTERS METAL ENCLOSURES

All starters are fitted with:

- Earth terminals, surge arrestors, internal isolators and **PUMP PROTECTION RELAYS**.
- Units up to 15 Kw, except ECONO starters, are fitted with motor terminals. On larger units, the motor cables are connected directly to the contactor.
